Product Summary

Directions

Mix each serving with 400 ml water! For a “loading period”, take a serving of CREA-BOMB for every 15 kg of your bodyweight daily (this way Creatine will saturate your muscles faster). Spread out these servings throughout the day and take them before meals. After 5 days, take only 1 serving a day for maintenance. If you wish to forgo a “loading period”, immediately start with 1 serving. Use as part of a healthy, balanced diet.

Allergen info

Manufactured in a facility that processes milk, soy and egg proteins, and gluten, peanuts!

Flavors

grapefruit, passion fruit, pink lemon

Sizes

12 g – 2 serving (packet), 25x12 g – 25 packet box, 660 g – 110 servings

There's advantage in diversity and teamwork. Don't take part in the futile debate of which single Creatine type is the best – take many types! “Carpet bomb” your muscle cells with every important version of Creatine with CREA-BOMB. Our best, 6 component multi-creatine matrix provides - among others - the most studied Creatine form ever! Creatine in this dose (at least 3 grams a day) is scientifically

proven to increase performance in successive bursts of short-term, high intensity exercise like weight training and interval cardio!* Some of our key ingredients also contribute to one or more of the following beneficial physiological effects*:

Normal protein synthesis. • Normal functioning of the nervous system: neurotransmission and muscle contraction including heart muscle. • Reduction of tiredness and fatigue. • Normal energy-yielding metabolism. • Normal psychological function. • Electrolyte balance. • Maintenance of normal bones and teeth.

** These statements have been scientifically proven and authorized by the European Food Safety Authority.*
