Product Summary

Directions

Take a serving always right before training and optionally some time after training. Mix with 400 ml water and shake vigorously for 30 seconds! Letting the drink sit for a while also increases the dissolution of the ingredients. Combine with carbohydrate for even better results. Use this product in conjunction with food as part of a healthy, balanced diet, not as a substitute for such.

Allergen info

Manufactured in a facility that processes milk, soy and egg proteins, and gluten, peanuts!

Flavors

grapefruit, pink limonade: 300 g; unflavored: 180 g

Sizes

180 g - 30 dose; 300 g - 25 dose

Product Description

Our formula provides all the 9 essential amino acids. Essential amino acids are indispensable for us, because they cannot be synthesized by the body and therefore must be supplied in the diet. The branched-chain amino acids (BCAA's) are among the essential ones and they account approximately for 35% of the essential amino acids in muscle proteins. The Leucine amount is the highest in our product as it is one of the most important aminos. The consumption of an essential amino acid solution immediately before weight training is great, because of increased delivery of amino acids to the muscles with increased blood flow!
