Product Description

Amino 5600 is a full-spectrum amino formula with - among others - all the essential and branched-chain amino acids. Essential amino acid are indispensable for us because they cannot be synthesized by the body and therefore must be supplied in the diet. The branched-chain amino acids (BCAA's) are also essential ones and they account for 35% of the essential amino acids in muscle proteins. Amino 5600 is manufactured from high-quality whey protein to ensure optimal results.
