a substitute for such. **KEEP OUT OF THE REACH OF CHILDREN!** Don't exceed the recommended daily dosage!

Sizes

30 capsules – 30 servings

Product Description

Live culture formula

11 strain, 10 billion CFU Our gut microbiota consists of trillions of different bacterial species in the digestive tract. In a healthy gut most of these species are "good" bacteria, which help you with immune defense (protecting against unwanted germs and pathogens), fiber fermentation and the production of Vitamin K. Stress, processed foods and lack of sleep may upset the balance and alter the quantity and quality of these gut bacterial species resulting in digestive and immune defense problems.

MICROBIOTA PRO contains 11 different bacterial species with a minimum of 10 billion active Colony-Forming Units per capsule guaranteed at the end of shelf life (20 billion CFU at manufacturing)!
